

32oz Handihold Natural HDPE Bottle Technical Datasheet

Product Description

This bottle and trigger is one of the best selling types albeit more expensive than other basic sprayheads. With a Viton® O-ring and piston cup they hold up against the harshest chemicals, including D-limonene and solvents. The outer body protects piston assembly to prevent damage during use and storage. A greater output per stroke significantly reduces the number of times you pull the trigger making them more efficient compared to other makes.

Tolco Triggers are sold separately, follow this [LINK](#)
