

Tolco Model Trigger 320CR Black Chemical Resistant 9.25? Technical Datasheet

Product Description

This bottle and trigger is one of the best selling types albeit more expensive than other basic sprayheads. With a Viton® O-ring and piston cup they hold up against the harshest chemicals, including D-limonene and solvents. The outer body protects piston assembly to prevent damage during use and storage. A greater output per stroke significantly reduces the number of times you pull the trigger making them more efficient compared to other makes.

Tolco HDPE bottles are available separately, follow this [LINK](#)
