

Bacoban For Aerospace 3% DL Fogging Type Technical Datasheet

Product Description

Frasers Aerospace is authorized to manufacture Bacoban and Bacoban for Aerospace in the UK.

Made in the UK by Frasers Aerospace. A Broad-spectrum, ready-for-use disinfectant that Kills a wide range of Viruses and Bacteria. Biocide Formulation: no harsh fumes, non-corrosive, bleach-free making it suitable for all aircraft internal surfaces.

This form of Bacoban for Aerospace is specifically formulated for use with fogging machines.

Aircraft disinfection is a common and extensively used process used by airlines and private operators on a regular basis. Disinfection prevents passengers from being infected by the growing number of viruses we hear about in the news.

Bacoban for Aerospace Aircraft Cabin Antiviral & Antibacterial Cleaner and disinfectant.

Following the cabin disinfection, the first passenger carrying any virus will re-infect the aircraft allowing the virus to be spread amongst passengers. This problem has now been solved by using Bacoban for Aerospace.

Effective for 10 days (Laboratory Tested) against viruses, 365 days against microbes (Laboratory Tested).

No other product on the market will provide continuous protection in this way. Viruses, bacteria and fungus will be destroyed continuously for this period. Infections on-board aircraft will be dramatically reduced.

Test certification is available

Bacoban for Aerospace establishes an ultra-thin nano layer with a lasting effect. The technology used is a sol-gel process that develops a solid gel nano layer. The biocides used to kill germs and viruses are embedded in the porous structure of the sponge like sol-gel and are washed out again slowly when coming into contact with water (bacteria, enveloped viruses and fungi are always surrounded by water).

Bacoban for Aerospace has been tested for the effective destruction of the following viruses:

Bacteria: Staphylococcus aureus, Pseudomonas aeruginosa, Escherichia faecalis etc. Viruses: Coronavirus, Monkeypox, Langya Virus, Hepatitis B and C, HIV, Influenza including H5N1 and H1N1, Rotaviruses, Adenoviruses, Herpes, and many more.

Product Description

Frasers Aerospace is authorized to manufacture Bacoban and Bacoban for Aerospace in the UK.

Bacoban For Aerospace 1% DL Standard Hand Applied Product from Frasers Aerospace. Broad-spectrum, ready-for-use aircraft disinfectant that Kills a wide range of Viruses and Bacteria. Biocide Formulation: no harsh fumes, non-corrosive, bleach-free making it suitable for all aircraft internal surfaces.

Aircraft disinfection is a common and extensively used process used by airlines and private operators on a regular basis.

Disinfection with Bacoban for Aerospace prevents passengers being infected by the growing number of viruses we hear about in the news including the Covid-19 strain.

Bacoban for Aerospace, a leading cabin disinfectant for use on board aircraft, can be used in all areas.

Sol-Gel nano thin SiO₂ layer containing the active ingredient Quaternary ammonium compounds. The active ingredient continues to destroy any bacteria or viruses which land on the surface. Surface cleaned with Bacoban for Aerospace.

Bacoban for Aerospace, disinfection spray, is an Aircraft Cabin Antiviral & Antibacterial Cleaner for aircraft disinfection.

Following the cabin disinfection, the first passenger carrying any virus will re-infect the aircraft allowing the virus to be spread amongst passengers. This problem has now been solved by using Bacoban for Aerospace.

This unique product will provide continuous protection against microbes for 365 days (Laboratory tested)! No other product on the market will provide continuous protection in this way. Viruses, bacteria and fungi will be destroyed continuously for this period.

Infections on-board aircraft will be dramatically reduced.

Bacoban for Aerospace establishes an ultra-thin nano layer with a lasting effect. The technology used is a sol-gel process that develops a solid gel nano layer. The biocides used to kill germs and viruses are embedded in the porous structure of the sponge like sol-gel and are washed out again slowly when coming into contact with water (bacteria, enveloped viruses and fungi are always surrounded by water). Bacoban for Aerospace is the idea aircraft disinfectant.

Bacoban for Aerospace has been tested for the effective destruction of the following viruses:

Bacteria: Staphylococcus aureus, Pseudomonas aeruginosa, Escherichia faecalis etc. Viruses: Coronavirus, Monkeypox, Langya Virus, Hepatitis B and C, HIV, Influenza including H5N1 and H1N1, Rotaviruses, Adenoviruses, Herpes, and many more. Test certification is available

Please note, due to packaging shortages, the 500ml spray bottle pictured here may not be supplied as alternatives are used to ensure supply.
