

NuGlaze

PAINT GLOSSER & UV PROTECTANT with POLYFLUORO SEALANT

For paint in excellent condition

GENERAL CLEANING

Paint with any oxidation or in need of surface cleaning should be dry washed with **NuPower II** prior to **NuGlaze** application.

1. Apply **NuGlaze** as is – DO NOT DILUTE to clean, terry towel, mophead or random orbital.
2. Spread over small, "18-24" area to be continuously worked.
3. Work material evenly onto surface and continue to wipe or buff area layered with product until material appears to be gone (force dry).
4. Move to next area and repeat process.

ACTIVATING THE POLYFLUORO SEALANT

1. Apply **NuGlaze** as is – DO NOT DILUTE to clean, terry towel, mophead or random orbital.
2. Agitate small area to a thin layer.
3. Allow wet material to dry or form a white haze on surface; this may take up to 20 minutes depending on humidity conditions.
4. Final buff with a random orbital to shine.

**Product dilutions are determined by extent, condition & soil type.*

When using any NUVITE product, please refer to appropriate procedures and recommendations for use and equipment, or contact a NUVITE technician for more information, unique applications and special requirements.
